PROFILE SUMMARY

Backend-focused Software Engineer with hands-on experience building scalable Java and Spring Boot applications through internship and project work. Skilled in REST APIs, microservices, Spring Data JPA, unit testing, and database design. Experienced in Agile environments, CI/CD workflows, and AI-assisted engineering practices to accelerate development and improve code quality.

EXPERIENCE

EPAm Systems | Junior Software Engineer Intern

Jan. 2026 - May 2026

Foundation & Technical Training

- Built backend applications using Java, Spring Boot, Spring Data JPA, REST APIs, and Maven.
- Gained hands-on exposure to Agile development practices and earned the **Claude Certified Architect** certification.

Project-Based Evaluation (PBE)

- Delivered a functional MVP for an internal coding assessment platform strictly within sprint timelines by engineering scalable execution modules within a microservices architecture.
- Coordinated communication between the development team and project manager, ensuring smooth sprint execution and timely resolution of blockers.
- Achieved 100% quality gate compliance by engineering comprehensive unit tests with JUnit 5 and Mockito, testing Dockerized services via Rancher Desktop, and actively resolving SonarQube code smells.
- Accelerated backend development workflows by applying the 4D framework (Delegation, Description, Discernment, and Diligence) alongside GitHub Copilot to rapidly generate, review, and refine Java microservices.
- Utilized Jira and Jenkins to support Agile project execution and CI/CD processes.

PROJECTS

E-Commerce Platform: [GitHub: github.com/HRS-K23/E-Commerce]

Jan. 2026

Tech Stack :- Java, Spring Boot, Spring Data JPA, Hibernate, Maven, MySQL, REST APIs, Git, JUnit, Mockito

- Engineered a backend e-commerce application supporting 4 core domains: user, product, cart, and order workflows.
- Streamlined modular integration by engineering 15+ RESTful APIs, utilizing DTO-based communication, robust exception handling, and clean architecture principles to ensure highly maintainable backend services.
- Applied validation, exception handling, DTO-based communication, and clean architecture principles to enhance maintainability.
- Secured ~90% service-layer test coverage by developing 30+ robust unit and integration tests using JUnit 5 and Mockito.

To_Do Application: [GitHub: github.com/HRS-K23/To_Do-Springboot]

July 2025

Tech Stack :- Java, Spring Boot, Spring Data JPA, H2 DB, Postman

- Engineered a high-performance task management backend to handle continuous CRUD operations, leveraging Spring Boot, Spring Data JPA, and H2 database for lightweight, rapid data persistence.

Event Management Application (inVITE): [Live: invite-cyan.vercel.app]

March - May 2025

Tech Stack :- HTML, CSS, JavaScript, MERN Stack

- Crafted responsive user interfaces and implemented event registration, management, and administrative dashboard features.
- Integrated frontend components with backend REST APIs and ensured cross-browser compatibility.

EDUCATION

- Lakshmi Narain College of Technology & Science, Bhopal, India | B.Tech, CSE | CGPA: 8.64 2026
- Sun Flower School, Begusarai, India | HSSC (Class XII) | Aggregate: 91.4% 2021
- DAV Public School, HFC Barauni, India | SSC (Class X) | Aggregate: 93.6% 2019

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript, Python
- Backend Technologies:** Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, Maven, Microservices
- Databases & Messaging:** MySQL, H2 Database, Apache Kafka, Redis
- Testing & Quality:** JUnit 5, Mockito, SonarQube
- Tools & Platforms:** Git, GitHub, GitHub Copilot, Jira, Jenkins, Postman, Swagger/OpenAPI, Docker (Basic)
- Core Concepts:** Data Structures & Algorithms, Object Oriented Programming (OOP), Database Management System (DBMS), Design Patterns, SOLID Principles, Agile Methodology

ACHIEVEMENTS

- Finalist, Smart India Hackathon (SIH) 2024 – Hardware Edition

CERTIFICATES

- Claude Certified Architect- Foundations | [Verify](#)

May 2026
